

# GREEN ROOF TRAY SYSTEM

## S-POD COMPONENTS

Saturated weight 55 kgs per m<sup>2</sup>

Size - 490 x 460 x 75mm

100% recycled plastic

UV resistant

Designed to aid water retention in dry periods and expel excess water in wet periods. Quick and easy installation with secure interlocking sides.

## BENEFITS

### VEGETATION

Up to 7 sedum species to include 4 native British sedums to ensure year round performance.

### FILTER FLEECE

This is a unique layer to us, ensuring the soil content does not leach away over time & good root anchorage, giving product longevity.

### WATERPROOF MEMBRANE

Customer supplied. The trays can sit directly onto the finished roof covering.

### EXPANDING CLAY

These Leca clay balls sit in the water retention chambers to provide drought protection and expel excess water in the winter.

### RECYCLED SUBSTRATE

A specialised British blend of lightweight recycled building waste and organic materials to act as a premium sedum growing medium.
